MISSION

Social studies education provides learners with the knowledge, skills, and perspectives needed to become active, informed citizens and contributing members of local, state, national, and global communities in the digital age.

Intent and Spirit of the Social Studies Standards

All students receive social studies instruction from Preschool through grade 12. The challenges of the 21st century are complex, have global implications, and are connected to people, places, and events of the past. The study of social studies focuses on deep understanding of concepts that enable students to think critically and systematically about local, regional, national, and global issues.

Authentic learning experiences that enable students to apply content knowledge, develop citizenship skills, and collaborate with students from around the world prepare New Jersey students for the 21st-century workplace. The natural integration of technology in social studies education allows students to overcome geographic borders, apply scientific and mathematical analysis to historical questions and contemporary issues, appreciate cultural diversity, and experience events through the examination of primary sources.

Vision

An education in social studies fosters a population that:

- *Is civic minded, globally aware, and socially responsible*
- *Exemplifies fundamental values of **democracy and human rights** through active participation in local, **state, national**, and global communities.*
- *Makes informed decisions about local, state, national, and global events based on inquiry and analysis.*
- *Considers multiple perspectives, values diversity, and promotes cultural understanding.*
- *Recognizes the relationships **between people, places, and resources as well as the implications of an interconnected global economy.***
- ***Applies an understanding of critical media literacy skills when utilizing technology to learn, communicate, and collaborate with diverse people around the world***
- ***Discerns fact from falsehood and critically analyzes information for validity and relevance.***

Social Studies Education in the 21st Century

The digital age has transformed social studies education, allowing 21st-century learners to transcend the limits of time and place and experience historic events virtually. By expanding their learning networks through online collaboration with experts and other students from around the world, New Jersey social studies students develop an increased depth of understanding of our global society. At the same time, their understanding of the fundamental principles and values of American democracy and citizenship provides the conceptual framework that allows them to make informed decisions about local, national, and international issues and challenges.

Differentiation Strategies

There are examples of differentiation within each unit, but this general list may be used at any time to assist the student towards a greater understanding of the social studies content.

(For students with disabilities, appropriate accommodations, instructional adaptations, and/or modifications should be determined by the IEP or 504 team)

Modifications for Classroom

- Pair visual prompts with verbal presentations
- Ask students to restate information, directions, and assignments.
- Give repetition and practice exercises
- Model skills/techniques to be mastered
- Give extended time to complete class work
- Provide copy of class notes
- Determine if preferential seating would be beneficial
- Provide access to a computer
- Provide copies of textbooks for home
- Provide access to books on tape/CD/digital media, as available and appropriate
- Assign a peer helper in the class setting
- Provide oral reminders and check student work during independent work time
- Assist student with long and short term planning of assignments
- Encourage student to proofread assignments and tests
- Provide regular parent/school communication

Modifications for Homework and Assignments

- Provide extended time to complete assignments
- Break down assignments
- Provide the student with clearly stated (written) expectations and grading criteria for assignments

Modifications for Assessments

- Provide extended time on classroom tests and quizzes
- Provide alternate setting as needed
- Restate, reread, and clarify directions/questions
- Distribute study guide for classroom tests
- Establish procedures for accommodations /modifications for assessments

Differentiation Strategies

Gifted and Talented

(content, process, product and learning environment)

- Allow students to pursue independent projects based on their individual interests
- Provide enrichment activities that include more advanced material
- Allow team-teaching opportunities and collaboration
- Set individual goals
- Conduct research and provide presentation of appropriate topics
- Design surveys to generate and analyze data to be used in discussion.
- Use Higher-Level Questioning Techniques
- Provide assessments at a higher level of thinking

English Language Learners

Modifications for Classroom

- Pair visual prompts with verbal presentations
- Provide repetition and practice
- Model skills/techniques to be mastered

Modifications for Homework/Assignments

- Provide Native Language Translation (peer, online assistive technology, translation device, bilingual dictionary)
- Provide extended time for assignment completion as needed
- Highlight key vocabulary
- Use graphic organizers

Interdisciplinary Connections

(also noted within each unit)

Social Studies is a unified body of knowledge whose concepts build upon each other. Connecting social studies concepts includes linking ideas to related ideas learned previously. Social studies events have global implications, and are connected to people, places, and events of the past. The study of social studies focuses on deep understanding of concepts that enable students to think critically and systematically about local, regional, national, and global issues.

Social studies and language arts should complement each other in literature as often as possible. Students will benefit from this cross-curricular relationship as they learn more about the world through literature. Social studies and science also complement each other when the students study ancient times, cultures, religion, and astronomy.

Grades K-2 Structure and Content

Social studies instruction in early elementary focuses on developing student's understanding of their role in their family, community, county and world. Students learn foundational ideas of government, democracy, human rights, the common good, citizenship, and civil discourse as well as explore the American identity through symbols, holidays, and monuments that are reflective of our values and principles.

Grade 6 Structure and Content

In middle school, students embark on instruction typically taught in a credit-based course format. Each credit is equivalent to a minimum of 40 minutes per week. Throughout this grade band, the performance expectations covered in standard 6.1 U.S. History focuses on the Revolution through Reconstruction (1754-1877) and standard 6.2 World History explores the beginning of man through global encounters (10,000 BCE -1450 CE). Standard 6.3 Active Citizenship in the 21st Century has students build their understanding of civics, government and human rights.

In addition, students are required to complete a civics course, minimum two quarters or equivalent, that addresses the values and principles underlying the American system of constitutional democracy; the function and limitations of government; and the role of a citizen in a democratic society.

- 6.1 U.S. History in the World (Grades kindergarten through 12)
- 6.2 World History (Grades 8 through 12)
- 6.3 Active Citizenship in the 21st Century (Grades kindergarten through 12)

The specific time periods (years) and names of the eras were informed by National Standards for History.

Standard 6.1 U.S. History: America in the World by the End of Grade 8

- Era 3 Revolution and the New Nation (1754–1820s)
